How Regular Signature Spas Platinum Use is Good for You

Relieves stress: Scientists now know that being in a portable spa can put the autonomic nervous system in a state of balance which helps subjects enter a calmer, more relaxed state.

Relieves muscle pain and tightness:

Pressurized water from jets act as pinpoint massagers, helping to loosen tight muscles.

Detoxifies the body: The warm water temperature of a spa — as high as 104 degrees Fahrenheit — causes sweating, which flushes toxins from the body.

Increases blood flow: Warm water immersions cause blood vessels to dilate, increasing blood flow which can facilitate healing.

Improves joint movements: Water makes the body buoyant, allowing free movement of joints without weight or pressure
